AIPC User Manual

(V3.1.9)

Compatible Devices: GMK EVO-X1/X2/T1 Series

Last Updated: July 24, 2025

Table of Contents

- 1. Introduction
- 2. Software Overview
 - 2.1 About AIPC
 - 2.2 Key Features
 - 2.3 System Requirements
- 3. Installation & Uninstallation
- 4. User Guide

1. Introduction

This manual provides step-by-step instructions for AIPC.exe, covering core functions (registration, navigation, service usage) and troubleshooting. For feature updates, refer to in-app notifications.

2. Software Overview

2.1 About AIPC

AIPC is an AI-powered assistant leveraging deep learning to deliver personalized services, including:

Smart recommendations

Natural language interactions

Context-aware task automation

2.2 Key Features

User System: Third-party login (WeChat/Google), customizable preferences.

Smart Tools:

Text generation/optimization

Meeting minutes automation

Multilingual translation

Professional Suite:

Contract review (risk analysis)

AI-generated mind maps

AI Model Management:

Local/cloud model switching (e.g., DeepSeek-R1-32B, Llama 4-109B)

2.3 System Requirements

Configuration	64GB RAM	128GB RAM
Max Model Size	13B (FP16)	70B (FP16)
Inference Speed	20-40 tokens/sec	40-80 tokens/sec
GPU Concurrency	2-4 requests/GPU	8-16 requests/dual GPU
Configuration	64GB RAM	128GB RAM

3. Installation & Uninstallation

3.1 Installation

Pre-installed on EVO-X1/X2/T1 devices—launch directly from desktop.

3.2 Uninstallation

Warning: Uninstalling removes local AI models. Proceed with caution.

Method 1: Via Windows Apps Manager:

Open Start Menu → "All Apps" → Right-click AIPC → "Uninstall."

1)

2)

Method 2: Via installation directory:

Right-click desktop icon → "Open file location" → Run "Uninstall.exe."

4.User Guide

4.1. Launching AIPC

4.1.1 Double-click desktop icon or right-click → "Open."

4.2 Offline Mode

4.2.1 Enable: Login screen → "Offline Mode" (local models only):

A. Double Click" AIPC"

B. Login page choose "Offline Mode"

4.2.2 Offline mode exit

1) Click on the avatar in the upper left corner of the main interface, the program will pop up the user overview interface.

2) Click "Exit Offline Mode" , a confirmation box will pop up.

3) Click "Confirm" to log out and return to the login screen.

4.3 Account Login and Logout

4.3.1 Account Login

1) Mailbox login procedure:

A.Input the mailbox.

B.Click send verification code.

C.Input the verification code received by mailbox.

D.Check the user agreement and privacy policy

E.Click login to log in. (Click the icon in the upper right corner to switch WeChat login)

2) Wechat Login:

A. Open and Scan QR Code

B. WeChat agrees to authorize and you can log in. (Click the icon in the upper right corner to switch mailbox login)

4.3.2 Account Logout

1) Top Left Hand Corner, Click Profile Picture

2) Click Sign Out.

4.4 User Interface

① The main interface is divided into the left navigation bar (in the red box): integrating the application's core function entrances (e.g., dialog,

settings, knowledge base, model market, etc.), and users can quickly jump to the corresponding module by clicking on the icon.

② Bottom input box (in purple box): users can select model, skill, networking, upload file, voice input function for conversation here

③ Conversation log button (icon in the upper right corner): click it to view the list of historical conversations and support fast backtracking or exporting chat logs.

④ Folding operation for the left and right panels of the main interface, while with the navigation button at the top right corner, users can zoom and close the application.

4.4.1 The main interface is divided into the left-side navigation panel (within the red box)::

① User Logout Module

Figure 4.4.1.1: The red arrow in AIPC indicates the user logout module.

② Chat Module Page

Figure 4.4.1.2: The red arrow in AIPC indicates the chat module page.

③ Knowledge Base Page

(Note: Initialize the environment before use. The MiniCPM-V model will be downloaded automatically. Do not delete this model or the knowledge base will not function.)

Figure 4.4.1.3: Knowledge base environment setup page

Figure 4.4.1.4: File upload page for knowledge base

④ Model Marketplace

Explore and download powerful AI models.

Figure 4.4.1.5: Model marketplace page

⑤ App Store Page

Find productivity and creative apps to expand AIPC's capabilities.

Figure 4.4.1.6: App Store page

⑥ Settings Page

Manage preferences and app configuration.

Figure 4.4.1.7: Red arrow indicates the settings page

4.4.2 Skill Selection

Figure 4.4.2: Skill selection area (highlighted in yellow)

The chat interface is designed like a messaging app, where users can input queries in the text box below and click send to start a conversation with the AI assistant.

1) Casual Chat (Default Mode)

Figure 4.4.2.1: Casual Chat interface

A relaxed, open-ended chat mode for lighthearted conversations, random thoughts, fun questions, or friendly exchanges.

2) Translation Assistant

Figure 4.4.2.2: Translation Assistant interface

A smart translation tool supporting multilingual input (text and voice), offering context-aware, natural translations. Includes features

like pronunciation, example sentences, offline mode, and saved records — ideal for learning, travel, and business.

3) Contract Review Assistant

Figure 4.4.2.3: Contract Review interface

Designed for individuals, businesses, and legal professionals, this AI-powered tool analyzes contract terms, flags potential risks, and suggests revisions. It enhances review efficiency and minimizes legal risks.

Note: This tool offers suggestions and does not replace professional legal advice.

4) Text Completion Assistant

Figure 4.4.2.4: Text Completion interface

Generates context-aware continuation based on your input. Useful for writing stories, reports, or articles — breaking creative blocks and increasing writing efficiency.

5) Meeting Notes Assistant

Figure 4.4.2.5: Meeting Notes interface

Automatically converts meeting audio or real-time dialogue into structured summaries. Extracts key points, tasks, and decisions — improving clarity and team productivity.

6) Mind Mapping Assistant

Figure 4.4.2.6: Mind Map interface

Generates structured visual mind maps from spoken or written input. Ideal for brainstorming, learning, and organizing ideas.

7) Weekly Report Assistant

Figure 4.4.2.7: Weekly Report interface

Consolidates work progress, analyzes task completion, and auto-generates clear, professional weekly reports. Supports multi-platform sync and intelligent polishing.

8) Knowledge Base File Retrieval

- A、 Upload your files in the Knowledge Base module
- B、 B. Switch to Chat > Skills > Knowledge Base File Retrieval
- C、 C. Enter your query in the chat box;

Figure 4.4.2.8: Upload files to knowledge base

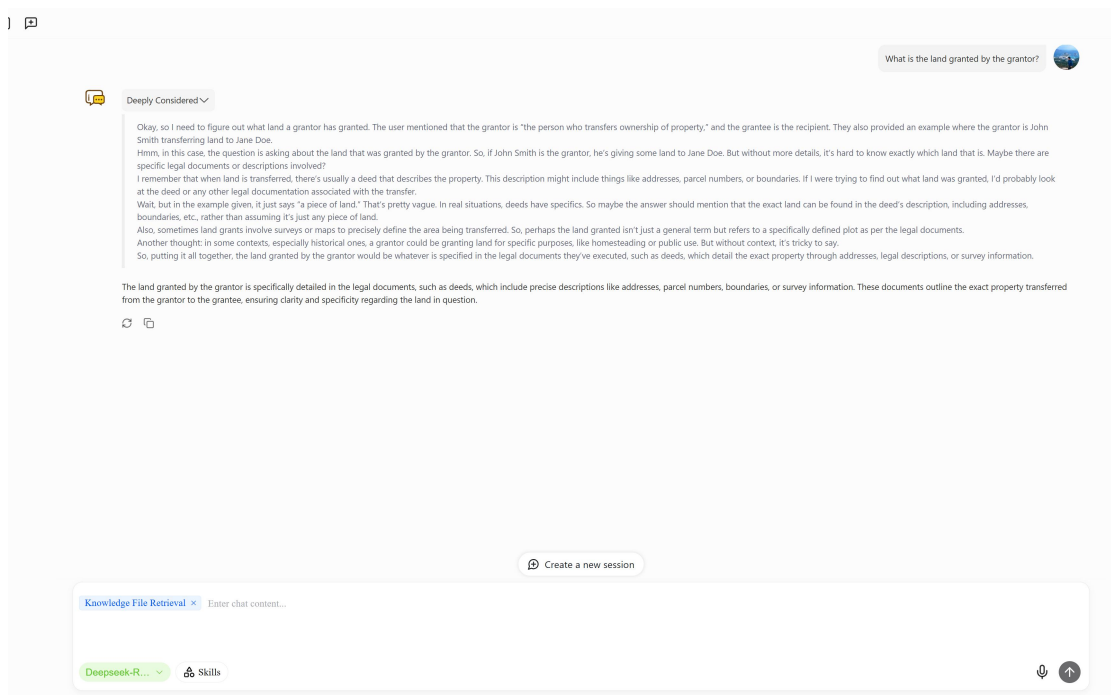

Figure 4.4.2.9: File retrieval interface

This feature uses AI to scan uploaded files, locate content quickly, and extract key info from large document sets.

9) Knowledge Base Image Retrieval

A. Upload an image folder to the Knowledge Base module

B. B. Switch to Chat > Skills > Knowledge Base Image Retrieval

C. Describe the image you're looking for

Figure 4.4.2.10: Upload image folder

Figure 4.4.2.11: Image retrieval interface

This AI-powered tool performs deep semantic analysis on bulk images to return highly relevant visual results based on your query.

4.4.3 Model Marketplace

1) Cloud-Based Models

Figure 4.4.3.1: Cloud model interface

These models run on cloud servers and require internet access.

Users can leverage powerful AI without local hardware — ideal for performance-demanding tasks.

2) Local Models (Requires Manual Installation)

Figure 4.4.3.2: Local model interface

Factory configurations:

EVO-X1 64GB: No pre-installed local model

EVO-T1 64GB: Pre-installed with deepseek-r1-32B:super (do not delete — no re-download path available)

EVO-X2 64GB: Pre-installed with deepseek-r1:32B

EVO-X2 128GB: Pre-installed with deepseek-r1:32B and Llama 4:109B

Local models run entirely offline on your device — ideal for secure, private environments with no internet connection.

4.4.4 MiniCPM-V Model

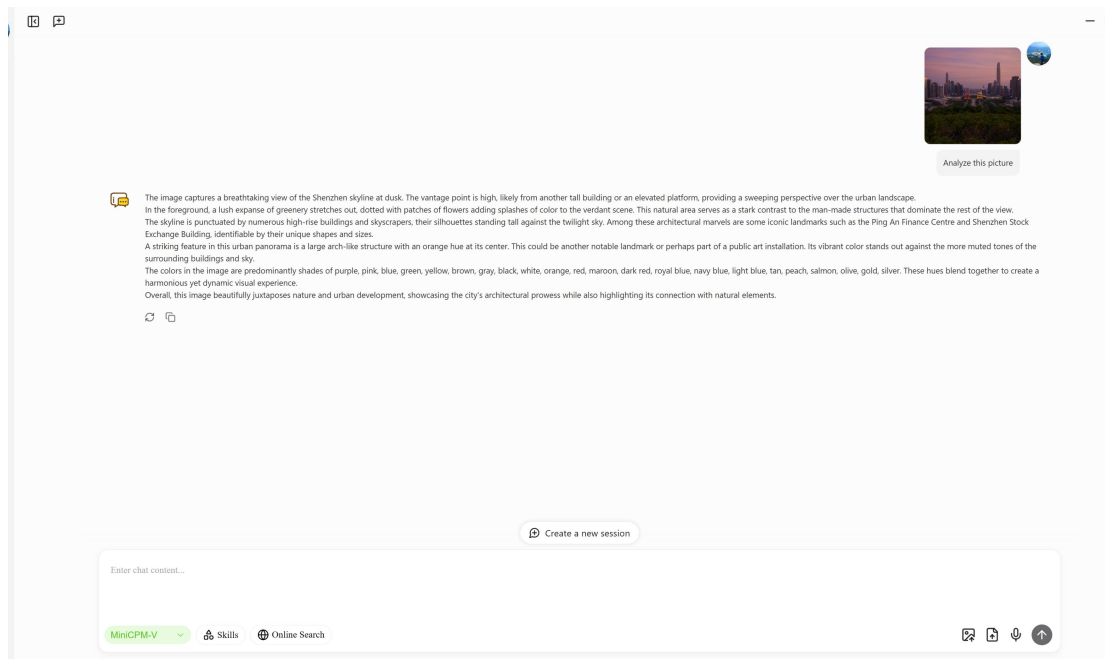

Figure 4.4.4.1: MiniCPM-V model conversation interface

MiniCPM-V is a high-performance multimodal model developed by SenseTime, supporting both text and image understanding.

4.4.5 App Store Page

Figure 4.4.5: App Store interface

The App Store offers curated links to top AI tools and platforms (like ChatGPT, Gemini, Stable Diffusion). It's a one-stop hub for accessing

third-party AI resources quickly and efficiently.

4.4.6 Settings Page

1) General Settings

Module	Function	Description
General Settings	Language	Switch application language
	Font Size	Adjust text size in the interface
	Theme	Toggle between light/dark themes

Figure 4.4.6.1: General settings interface

2) About

Figure 4.4.6.2: AIPC "About" Page

The "About" page offers transparent version management, allowing users to view the current version number of the AI assistant, access update logs, and read feature summaries. This helps users clearly understand improvements made in each iteration and ensures their experience stays aligned with the latest technology.
