

SOP Update LED Strips FW Operation Guide

Open the LED Strips app on the system and switch the effects to check if they are normal;

Uninstall the Minisforum app in the program;

Use the FW update tool to update the FW, new FW version: F1WAA_FirmwareUpdate_V0.8_20260128;

After the upgrade, shut down and disconnect power (must shut down, not restart), then restart the host

Then install the minisforum program
